

# Sustainable Combustion TCP

Highlights and updates from the TCP for EUWP

May 6-7, 2024

Gurpreet Singh,

**Chair of the Sustainable Combustion TCP**

**Department of Energy, USA**

and

Paul Miles

**Operating Agent of the Sustainable Combustion TCP**

**Sandia National Laboratories, USA**

# Sustainable Combustion TCP

## Top priority policy message

- Policies requiring technologies with **only** “zero” emissions of greenhouse gases or pollutants limit technology options and are likely to delay decarbonization

## Achievements

- Implementing Agreement rewrite approved and 5-year RfE approved

## Dissemination and Publications

- Gave expert testimony publicly and continued extensive scientific publication

## Collaboration and Co-operation

- Collaboration with AMF and H<sub>2</sub> TCPs on white paper on sustainable fuels
- GREET+ and IEA meeting (*e.g.*, CERT, TCG, EUWP, *etc.*) participation continues

## Management

- Aftertreatment task development for low-carbon applications nearing completion
- Successful Task Leaders Meeting held with 57 participants, plus others on-line

## Outlook to the Future

- Our shift to focus on “Hard-to-electrify” sectors using sustainable fuels
